

## POWER WEEDER - BACK ROTARY

### FARM MECHANISED EQUIPMENT

Suitable for multiple mechanized operations such as weeding, tilling and soil preparation in agricultural and horticultural crops and plantations.

### Technical Description

| CODE                          | ARD/BR                   |
|-------------------------------|--------------------------|
| Engine type                   | Diesel engine            |
| Engine power hp/kw@rpm        | 9.0/6.3@3600             |
| Speed                         | 4 Forward,<br>2 Reserve  |
| Fuel tank capacity (ltr.)     | 5.5                      |
| Oil filling in engine (ltr.)  | 1.65                     |
| No. of blades                 | 24 pcs, 6 set            |
| Tilling width (mm)            | 600-800                  |
| Tilling Depth (mm)            | ≥150                     |
| Dimension LxWxH (mm),(approx) | 1500x570x830             |
| Net weight (kg), (approx)     | 135 (Without Attachment) |

### Features

- With 5.0 - 1.0 Size tyre
- Ergonomically adjustable handle design that reduces operator fatigue
- Effectively uproots weeds and gives effective tillage
- 360 degree rotating handle
- Cost effective, labour and time saving equipment
- Powerful high performance Diesel engine for effective operations
- Ergonomic, anti-vibration design that reduces operator fatigue
- 40 pcs dry-land blades for central rotary. 18 dry land blades/ 1 set ditching blade
- 6 gears direct coupled gear box
