## **ACADEMIC PROJECTS AND EXPERIENCE**

### **2019-2019 MOVING AGRO SPRAYER**

In the agriculture field, we will be spraying pesticides in order to have good harvest of the particular plant. We are spraying the above mentioned thing by converting. This project is design by following BLOCK SPUR GEAR, CAM, WHEELS, AGRO SPRAY TANK and SPARY NOZZLE.

### **WORKING PRINCIPLE**

We are going to use the cheapest method by utilizing the kinetic energy. The rotary movement of the wheel is transferred to the cam plate connected through spur gear, the cam convert the rotary movement into linear motion to pump the pesticide to the agriculture field. We have design and developed a system called mechanical moving agro sprayer. This system could be moved along the filed for spray.
